Engineering Reliable Energy Infrastructure

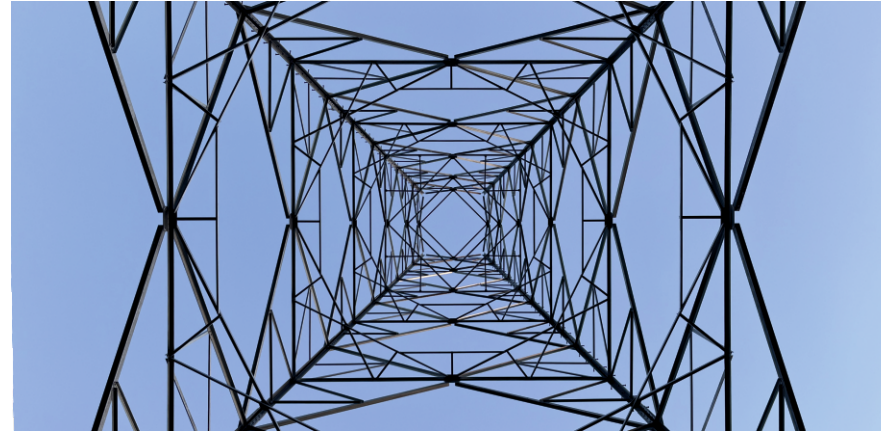

Design • Construction • Commissioning • Maintenance

Company Profile

PCTEL is an engineering company specialized in the development, construction, commissioning, and maintenance of electrical power infrastructure and energy systems.

With experience across utility, industrial, and renewable energy sectors, the company delivers **turnkey solutions** across the full project lifecycle, from concept development and detailed engineering to installation, testing, and long-term operational support.

Our multidisciplinary team combines engineering expertise, field experience, and a practical understanding of **complex energy systems**, ensuring reliable project execution under diverse technical and operational conditions.

Core Capabilities

Turnkey Solutions

- Design
- Engineering
- Construction & Installation
- Testing & Commissioning

Emergency Response

- Rapid Deployment Teams
- Emergency Power Support
- System Restoration
- 24/7 Availability

Power Infrastructure

- Substations
- Electrical Switchgear
- LV / MV / HV Systems
- Distribution Infrastructure

Renewable Energy

- Solar Power Plants
- Battery Energy Storage Systems
- Grid Connection Solutions
- Hybrid Energy Solutions

Maintenance

- Preventive & Corrective Maintenance
- Technical Support
- System Upgrades
